

ALERT WATER LEVEL SENSOR LOCATION MAPS

BOULDER COUNTY

DISTRICT CENTRAL

1994 ALERT WATER LEVEL DATA SUMMARIES HAND-WRITTEN NOTES, SYMBOLS AND OTHER COMMENTS

- CIRCLED ITEM:** Indicates either suspect or obviously incorrect data. The cause of the problem may be identified by a letter or brief note. A circled item without any notation indicates that the data is suspect but may be valid pending further inspection of the database. For a more detailed discussion of possible data errors, refer to the *UDFCD Disclaimer Notice* on page 3 of the annual report.
- LETTER "B":** Indicates battery failure.
- LETTER "E":** Indicates problem with radio transmitter or other electronic component.
- LETTER "M":** Indicates maintenance activity. The water level data presented in the table may include manual testing for calibration of the sensor. Maintenance records are available for public inspection at the District.
- LETTERS "RF":** Indicates marginal radio communications problem.
- LETTER "S":** Indicates defective water level sensor.
- LETTER "V":** Indicates vandalism.
- BOULDER COUNTY:** Water level data collected from the Boulder County ALERT gaging network is made possible by a District-maintained radio repeater station located at the Boulder County Jail. The ALERT gaging station listed on pages D-BOCO.37.1 through D-BOCO.48.2 are maintained by the Boulder County Sheriff's Department. Detailed maintenance records are not available from the District.

High water not caused by runoff event, See footnote.

FOOTNOTE: Discharge values are inaccurate. Sensor was relocated on April 20 following completion of the Croke Canal/Ralston Creek crossing and side intake structure by the City of Arvada. Flashboards are periodically installed in the Ralston Creek low flow channel keyway to divert flows for water use. The discharge rating curve will be revised for 1995 to reflect an unobstructed low flow channel.

SENSOR NUMBER	STATION NAME	SENSOR TYPE
123	Croke Pump Station	Water Level PT
120	Croke Pump Station	Precipitation

CAVEAT: The data on this page does not represent an official record. The ALERT database contains a certain amount of erroneous data and therefore, the above summary should not be considered accurate without further verification (Ref: UDFCD Disclaimer Notice). Limited efforts have been made to identify erroneous data. If further documentation is desired, contact the Urban Drainage and Flood Control District at (303) 455-6277.

FOOTNOTE: Sensor is located at bottom of low flow channel upstream of vertical drop inlet to triple box culvert. The discharge rating table was calculated assuming inlet control hydraulic conditions. The affect of the drop inlet was not considered in the calculations. Therefore, low and moderate flow values are inaccurate. Direct flow measurements are recommended to verify low flow discharges.

Cause unknown, working properly on 5/18

FOOTNOTE: Sensor is positioned 2.3-feet above box culvert invert to avoid siltation problems. Therefore, low flows are not measured at this site. The discharge rating table is based on inlet control hydraulics assuming clean culvert conditions.

FOOTNOTE: Sensor failed on or about June 26. Verified by field maintenance on June 28. Spare sensor with long cable not available and new housing required. Station is being considered for upgrade by City of Aurora in conjunction with water reuse project. Therefore, sensor repair was delayed and remained out-of-service through 1994.

SENSOR NUMBER	STATION NAME	SENSOR TYPE
713	Horseshoe Park Drop	Water Level PT
710	Horseshoe Park Drop	Precipitation

CAVEAT: The data on this page does not represent an official record. The ALERT database contains a certain amount of erroneous data and therefore, the above summary should not be considered accurate without further verification (Ref: UDFCD Disclaimer Notice). Limited efforts have been made to identify erroneous data. If further documentation is desired, contact the Urban Drainage and Flood Control District at (303) 455-6277.

FOOTNOTE: Sensor is positioned on channel bottom at entrance to box culvert. The box culvert serves as a connecting section to a downstream elliptical concrete pipe. A super-critical concrete channel carries flow to the box culvert. Consequently, hydraulic conditions at this site are difficult to calculate and the corresponding rating table should not be considered accurate.

- Calibration drift noted on May 14 inspection report.
- Problem continued through entire flood season.
- SE shield cable grounding problem resolved on Oct. 5.
- Database calibrations performed 4/3, 6/10, 7/3, 7/19, 8/10, 8/12, 8/23, 10/6 and 11/11 to obtain best possible correlation with USGS ADR records (i.e. 15-min punch tape).

SENSOR NUMBER	STATION NAME	SENSOR TYPE
1699	Cherry Cr @ Wazee	Water Level Float
1700	Cherry Cr @ Wazee	Precipitation

CAVEAT: The data on this page does not represent an official record. The ALERT database contains a certain amount of erroneous data and therefore, the above summary should not be considered accurate without further verification (Ref: UDFCD Disclaimer Notice). Limited efforts have been made to identify erroneous data. If further documentation is desired, contact the Urban Drainage and Flood Control District at (303) 455-6277.
