Comment

1. Pond and drainage certification
2. our engineering staff may use it but we do not use it in our planning department
3. I am trying to incorporate this manual information into our daily reference material for landscape LID practices, from a city commercial landscape plan review stand point.
4. Teaching Reference, BMP Design Details
5. Recommend to engineers
6. access to standard details
7. Information on 4-step process
8. I rely on the expertise of Professional Engineer
9. Source of methods to suggest in design meetings
10. I have just become aware of it and hope to use it in the future.
11. Students are required to use it in my Stormwater Management Course
12. Most developements want the cheepest and easiest and most reliable solution and the one with the lowest land/value rating
13. Basis for recommendations to other communities on documents similar to Vol. III
14. our design firms use it all the time
15. Don't use it for what I do. Drainage and stormwater issues are strictly handled by Public Works. However, I believe with all of the concern about sustainability that will change and there will be more involvement in this area by Planners and Landsape Architects in this city.

16. Assistance with construction details
17. use for updates that are more recent than similar criteria that our area uses
