Subject: RE: August 2010 Performance Evaluation of ALERT Gages in Hayman Burn Area

Garth,

Below is a summary of the performance of the ALERT stations in the Hayman Burn area this past month. Also attached is the performance map for the entire District.

It looks like a couple of gages have been improved. Three stations continue to exhibit poor performance: Four Mile Creek (5720), Monument Gulch (5780) and Goose Creek (5800).

Let me know if you have any questions.

Thanks,
Markus
